

HW: Inverse Functions

- 1) Give the inverse of $f(x) = \frac{x^2 + 6}{5}$
- 2) Give the inverse of $f(x) = 2x - 6$
- 3) List 4 points that would be on the inverse of the graph
- 4) Use composition to tell if $f(x) = -2x + 3$ and $g(x) = -\frac{1}{2}x + \frac{3}{2}$ are inverses
